MYSQL Nest js Fastapi

PERSONAL PROJECTS

Taxi Booking Application (03/2022 - 04/2022)
- Created a web application for taxi booking. It was a team project, were I have worked on front-end angular part. we won first place for the project event using this project.

Personal Expense Tracker (06/2022 - 12/2022)
- Developed a expense tracker for personal purpose. This project is developed for the Naan Mudhalvan event. IBM has given backend access free to connect.

Disease prediction using scanned images (02/2023 - 04/2023)
- Used ML algorithm to train the module and get accuracy of 99 percent. Using MRI images prediction of disease is accomplished.

Cyber phishing application (09/2024 - 12/2024)
- Developed a phishing application to send emails using Google connectors, Microsoft connectors, and smtp. User can create templates for how the email should look like.

VAPT Automation tool (12/2024 - Present)
- Used React ts, python Fastapi and celery for queue. Developing a vulnerability assessment test automation tool to make easier and quicker response. Work on schedule basis. The tools is listed and user can pic the tool and run it either on ip or domain.

Dorking tool (01/2024 - 03/2024)
- Used React ts, python fastapi and celery for queue. Developed a scrapping tool which scraps data based on keywords provided. We have provided teams and slack webhook for the results. There are various sites that we embedded. It will match the keyword on sites that we select. Work on schedule basis.

INTERNSHIPS

Virtusa (01/2023 - 05/2023)
Fullstack Intern at Virtusa. Given sample cases to develop and deploy the sites to measure the efficiency.

EXPERIENCE

Finstein Advisory (06/2024 - Present)
Associate trainee
